CAT® WELLHEAD GAS GENERATORS

THRIVE IN OIL & GAS APPLICATIONS.
Save money every day by running a purpose built, reliable Cat® gas engine.

Purpose-built wellhead gas generator sets from Energy Power Systems Australia (EPSA), Caterpillar's exclusive engine dealer, are powered by a Cat® gas engine, designed with local knowledge of Australian oil and gas field conditions.

Cat gas engines are a culmination of over five decades of Caterpillar's experience in quality, engineering and manufacturing of gas and diesel powered engines. And we leverage this experience to produce the best outcome for your operation:

- Cat® gas engines meet full prime rated output at ambient site conditions
- Cat Power Systems provide the most suitable technology, delivering efficient power with optimum reliability.
- EPSA's team of experienced engineers and designers can tailor a solution to meet your wellhead power requirements.

PERFORMANCE Prime rated design to meet high ambient field conditions.

RELIABIL- Durable, proven heavy duty industrial Cat® gas engine.

AVAILABILITY Extended service intervals mean less operations and maintenance costs.

BUILT FOR IT

EPSA's purpose-built wellhead gas generator sets are driven by a Cat® gas engine in a sound attenuated, skid mounted, weather proof enclosure.

Now, more than ever, availability and reliability count.

LOW TOTAL COST OF OWNERSHIP

- Total cost of ownership over full life engine is lower
- Remote monitoring capability via satellite, 3G or ethernet cable
- Ease of operation - operator friendly
- Low fuel usage
- Transient & variable speed applications

CUSTOMISED DESIGN AND ENGINEERING

- Our unique design features extend service intervals.
- Gas generator sets built to meet Type B Gas Compliance
- Plug & Play options
- Solar charging systems
- Automated step load bank options
- Auto oil top up tank
- Naturally aspirated, turbocharged and after cooled options allow you to match emissions and dependability requirements to your specific needs

CAT G3306 ENGINE

Unlike one size fits all generators, Caterpillar offers a full line of natural gas generators designed and rated to work specifically for continuous wellhead power applications.

AUSTRALIAN CONDITIONS

Built to operate in harsh Australian environments, Cat® gas wellhead generators are part of the Cat® 300 series with proven performance in Australian site conditions.

REMOTE MONITORING

Remote monitoring capability enables preventative maintenance monitoring, minimising your downtime.

SERVICE & SUPPORT

Our product support is just as strong as our product line. Backed by the Cat® Dealer Network – you will have access to 24/7 parts and service support through your local Cat Service Dealer, Hastings Deering.

At the Hastings Deering Gas Centre of Excellence in Toowoomba, Hastings Deering leads the way with a reliable and dependable service of end-to-end solutions that keep your operation producing. Backed by the strength of Caterpillar and the global Cat® Dealer Network, Hastings Deering supports in reducing downtime and increasing productivity.
